Olympus Tellus and Grounding

Nature is the best constructor ! That's why at Entreq we try to build in the same way . The result is a natural sound and a flow in the music that is seldom heard . We believe that grounding is the foundation and starting point for any system. With the Olympus line we were totally free to implement all of our combined knowledge, using no fixed parameters to re-design from the ground up. So in the Olympus Tellus we have seven grounding posts and employ an all new mineral-mix as well as a reduction of the quantity in some metal particulates. There is also the inclusion of some all new metals, one of which is Magnesium. This together with six all new solid Silver binding posts, instead of our normal solid Copper posts, gave us an even better noise reduction. In the Olympus Tellus we have also employed one special solid Copper binding post that is completely isolated from the other six Silver grounding posts. This can be used for connecting a specific new mains Ertha cable providing a direct connection to the protective ground found in your mains sockets. This reduce's the noise floor significantly! The Olympus Tellus offers the same overall sonic signature as the Olympus MinimUs. Deep and massive low frequencies while still retaining the air and texture in the wider spectrum. The separate outlet, allowing direct connection to a wall socket, (the protective ground) will give you a whole new experience. For more information please see the Entreq website or ask you nearest stockist for a demonstration.

Entreq Grounding

Innovation

Entreq have been pioneering signal grounding since 1999 . Over the past 16 years they have established an understanding and a level of knowledge in this unique field that up until recently no other audio or electronics manufacturer had either taken time to explore , understand or even deem worthy of research . This puts Entreq in the enviable position , certainly in the audio industry , of being the leader rather than the follower in this arena .

Ground Box

Something to establish is that Entreq's use of the term Ground does not directly relate to or mean 'Primary Earth' i.e. what you would understand as your 'Protective Earth' for your mains electricity . Entreq Ground Boxes are not designed to substitute or replace the protective ground found in your home . The function of the Entreq Ground Box is to present itself as an attractive destination for high frequency noise , stray voltages and the various issues induced by magnetic field effects . This pollution is littered across the system and is always present . Different systems attract , generate and produce different levels and types of noise ! **This is why Entreq offer a selection of Ground Boxes to suit every system and budget .**

Get Connected

You now need to connect your Ground Box to your equipment !

Establishing a connection to your hifi system with an Entreq Grounding Box couldn't be simpler . Entreq make a range of Ground Cables called Ertha Cables that attach to any free and available connection on any product connected to your system . Connections currently catered for include : RCA , XLR , USB , BNC and RJ45 . On the other end of the Ertha Cable is a spade termination that attaches to the Ground Box itself . As per the Ground Boxes these Ertha cables come in a range of levels ; offering the end user the ability to closely match the right combination of both Ground Box and Ertha Cable to obtain optimal performance .

Generally the key component to Ground first is often the product at the centre or hub of your system , whether that is your Pre-amplifier, Integrated amplifier or Dac/pre . Next you should consider a source component ; either your CD player / DAC , Streamer , Phono stage etc .

Once connected to your system the improvements are usually noticeable within minutes however the grounding process will continue to evolve . After approximately 24 hours you will in most cases have obtained the optimal result . It is not uncommon to hear continual Improvements up to and beyond 72 hours !

Please feel free to visit : www.entreq.com for further information on Entreq .
