whf.cm/ChordAnalogueRCA

We didn't set out to add a second Awards category for analogue interconnects, but so enamoured are we by the Chord Company Clearway, we had little choice but to do so.

The Clearway is really like a souped-up C-Line, with heavier-gauge, oxygen-free copper conductors, upgraded insulation and silver-plated VEE 3 RCA plugs. And we could use the same line to describe its performance.

Everything has been cleaned and given that added analytical insight you really need when upping the price, but there is now even more in terms of dynamics and organisation.

Further down the food chain, you may face a choice between transparency and expression, but Chord has shown that, for £90, you are more than welcome to both.
