

CM100

IP Multicast Control module for TCP/IP, RS-232 and IR control of Blustream Multicast systems

Description

Our UHD Multicast distribution platform allows distribution of HDMI video over a 1GB Network switch. The CM100 Control Module allows simple third party control of the Multicast system using TCP/IP, RS-232 or IR. The system wizard PC configuration program and pre-built Blustream product drivers simplify product installation and negate the need for an understanding of complex network infrastructures.

Specifications

Simple system configuration using Blustream Wizard PC program

2x RJ45 LAN connections to bridge existing network to Multicast video distribution network, resulting in:

Better system performance as network traffic is separated

No advanced network setup required

Independently configurable IP address per LAN connection

Allows simplified TCP/IP control of Multicast system

RS-232 integration for control of Multicast system

IR integration for control of Multicast system

PoE (Power over Ethernet) to power Blustream product from PoE switch

Local 5V power supply (optional) should Ethernet switch not support PoE

3rd Party drivers available for all major home control brands
